

OKLAHOMA CITY COMMUNITY FOUNDATION

# INVESTMENT REPORT 2018

## A Letter from the Investment Committee

A fundamental value of the Oklahoma City Community Foundation’s investment program is our prudent approach to spending. Since 1989, our endowment distribution policy has been structured to provide a stable income stream to charitable beneficiaries, while preserving the fund value and maximizing the opportunity for growth. Annual distributions are calculated using 5 percent of the fund’s average market value for the previous 12 quarters as of March 31.

Likewise, the Oklahoma City Community Foundation’s investment strategy is judiciously designed with a long-term horizon in mind. In fiscal year 2017, the investment committee made strategic moves to increase potential future net returns including lowering investment fees, increasing permitted exposure to higher return asset classes and diversifying asset classes to include non-correlated investments. During fiscal year 2018, the investment committee adjusted the tactical allocation of assets to reflect the current investment environment. (See Page 2 for new tactical allocations.)

### New Investment Options

Additionally, the investment committee elected to expand the available investment options to accommodate donors with varying levels of risk tolerance. These new investment options will allow donors the ability to align their investments with their philanthropic goals. Our eligible fund types — advised funds and affiliated funds — do not have nonprofit beneficiaries that rely on annual distributions, and therefore are able to tolerate greater investment risk.

As of July 1, 2018, donors with advised funds and affiliated funds with a balance of \$250,000 or more have two new investment options in addition to our general investment pool: 1) a 100 percent equity pool and 2) a moderate growth pool. Both options will have larger equity exposure as compared to the general investment pool. Donors who are eligible for these new investment pools have received additional information regarding the new options.

## Asset Allocation

The Oklahoma City Community Foundations' general investment pool maintains a diversified portfolio that includes exposure to higher return asset classes, as well as non-correlated investments. The investment committee, together with investment counsel Jack Marringa of United Capital Financial Advisors, LLC, determines asset allocation and remains disciplined in emphasizing diversification of assets, quality investments and a long-term perspective.

During Fiscal Year 2018, the investment committee adjusted the general pool's tactical asset allocation, increasing equity exposure from 56 to 57.5 percent and decreasing the targeted fixed income allocation from 34 to 32.5 percent.

### General Investment Pool Target Asset Allocation
