

Investment Performance Report

Our Investment Management Process

A key goal of the Oklahoma City Community Foundation Trustees and our Investment Committee is to achieve good investment returns that allow for annual distributions from endowment funds, help increase the value of the funds and ensure the endowments exist for the future.

While the markets can be volatile, our intent is to have a strong process for allocation and review. We are fortunate to have a committee that is well-informed and actively involved. We have always been transparent about our investment process and the results and we are pleased that our efforts have resulted in a solid investment product for our donors and the charitable organizations.

Investment Committee

Our Investment Committee comprises of six Trustees or past Trustees and three community leaders who are knowledgeable about investments. The members of the Investment Committee for FY2012 are listed on page 3. It is the role of the committee to oversee the investment functions through adopting the investment policy, hiring the primary professional investment consultant and each of the investment managers. During quarterly meetings, the committee reviews the investment performance and the recommendations for the allocation of assets to equities or fixed income and then to the various style sectors. This committee performs one of the most important functions that we offer to support donors and charitable endowment funds.

Investment Consultant

Since 1988, Hotchkiss Associates has served as our investment consulting firm. Jack Marringa is the principal who serves as the direct contact with the committee and our staff. Based in Chicago, Hotchkiss Associates is a division of United Capital Financial Advisors. In addition to monitoring investment performance and making recommendations about asset allocation, Mr. Marringa and the firm assists with the selection of style-specific managers to implement our allocation policy.

Our Investment Process

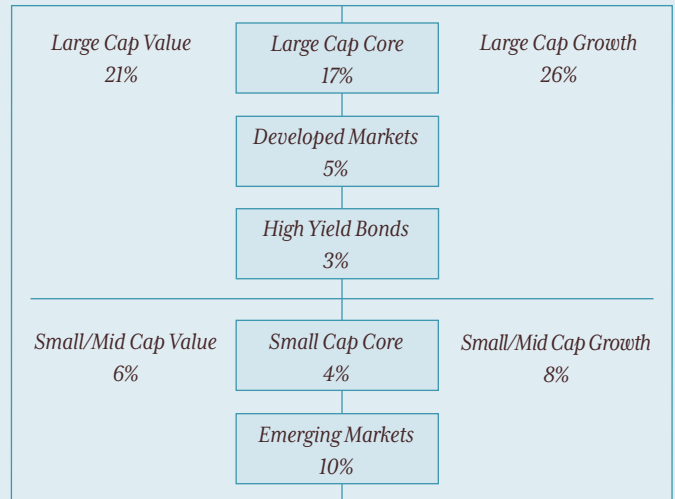

Our management process begins with the committee's determination of percentage of the assets to be allocated between equities, fixed

As of Fiscal Year ending June 30, 2012

Asset Allocation Model - General Pool

	Target	Range
Equity	65%	40-70%

Maintaining a disciplined approach to investment management

Since our founding in 1969, the Oklahoma City Community Foundation has been central Oklahoma's leading advocate for building endowment funds through not only support from donors but also through sound investment and distribution strategies. Our investment policy benefits all endowments, large and small, because we balance the use of active managers and index funds in a way that maximizes the opportunity for adding value while keeping the cost low. As a result, we have produced annualized returns over 10 years that exceed the markets but at a cost much lower than mutual

funds or other balanced fund alternatives.

Our investment policy is specifically designed for an endowment fund to provide annual distributions for charitable purposes in perpetuity. Our investment policy has four major objectives:

- Capital preservation
- Inflation protection
- Continuing source of annual distribution for charitable purposes
- Investment return in the top third of professionally managed funds

Our Investment Committee uses a style-based investor management system and allocates assets to specific investment styles. The committee hires investment managers to manage a particular style. We use nine active managers; seven for equities and two for fixed income investments. Approximately 60 percent of the pooled investments are actively managed.

As endowment fund investors we have a perpetual horizon and maintain a disciplined

See **APPROACH** on next page

Process

Continued from previous page

income securities and cash. Next, the committee determines the equity allocation among the various styles of equity management (see chart on page 1).

Once allocation is determined, the committee selects the style-specific managers. The managers' performance is evaluated

against the appropriate benchmark for their particular sector and their adherence to the specific style they have been engaged to manage. For FY2012, we had seven active equity managers listed below.

Index Funds

In addition to these managers who actively select stocks in each of their respective sectors, we also use a group of index funds

to provide additional diversification within each sector. The return from the index funds is targeted to match the market, and the relatively low cost of these index funds assists us in maintaining a very low total cost for our investment operations. The primary provider of these index funds is BlackRock (New York) (formerly Barclays Global Investors) and the annual costs range from 5 basis points to 35 basis points.

General Pool Investment Active Managers *as of 6/30/2012*

Large Capitalization Value

O'Shaughnessy Asset Management (Stamford, Conn.) Hired in February 2012 and invests in companies with a market capitalization greater than \$10 billion and are classified as value stocks.

Large Capitalization Core

Saratoga Research and Investment Firm (Saratoga, Calif.) Hired in February 2012, the firm's orientation is to high-quality companies at a price that provides an opportunity for appreciation.

Small Capitalization Value

Earnest Partners, LLC (Atlanta, Ga.) Hired in 2003 and manages value stocks with capitalization of \$2 billion or less.

Small/Mid Capitalization Growth

Columbus Circle Investors (Stamford, Conn.)

Hired in 2001 to manage stocks with a market capitalization of less than \$10 billion that are classified as growth stocks having good prospects for increasing revenue and earnings.

Small Capitalization Core

Kalmar Investments Inc. (Wilmington, Del.) Hired in 1998, Kalmar's style is described as "growth with value" in the small-capitalization universe and is classified between both growth and value for asset allocation decisions.

High Yield Bonds

Wells Capital Management (San Francisco, Calif.) Hired in 2009, Wells is a division of Wells Fargo and manages a portfolio of bonds with greater risk and higher yield than normal fixed income securities but still investment grade. The Investment Committee has classified this

asset with equities because of the type of risk associated with this asset class.

International

Aberdeen Asset Management (U.S. headquarters in Philadelphia, Pa.) Hired in 2008, the firm is a global investment management group that provides an active manager component in the emerging markets sector.

Fixed Income

Our fixed income investments are managed by **JP Morgan Chase Asset Management** and **BOK Financial**. Both of these institutions have a long history in our community and have worked with the Oklahoma City Community Foundation for many years.

Approach

Continued from previous page

approach to long-term investment strategy while utilizing short-term tactical allocations to add value when opportunities arise. We also remain committed to a long-term diversification strategy with an allocation to high quality fixed income assets even in times of booming equity investments. In addition, our prudent distribution policy (summarized below) provides a structured method of making distributions from an endowment that protects the stream from inflation thus creating a predictable annual distribution and allows the Investment Committee to focus on maximizing total investment return.

While the volatility of the markets in recent years has been a challenge, our committee has remained disciplined in staying with a policy that emphasizes diversification of assets, quality investments and a long-term perspective. Both the committee and our Trustees view these responsibilities as among the most important that we provide as managers of the community's endowment.

Distribution Policy

Since 1989, we have used a distribution policy that permits endowments to capitalize on good investment years as well as protect them in low or negative return markets. Cash distributions from most of the endowment

funds we administer are based upon a spending policy that calls for distributing 5 percent of the fund's average market value. The remaining investment return is left in the fund to increase the value. The annual distribution amount is based upon a rolling 12-quarter average of the fund's market value. While there are other approaches to determining distributions, the 5 percent spending rule does not require a specific investment allocation to income-producing assets and is not subject to short-term market fluctuations.

For more information on our investment and distribution policies, please contact Rhonda Godwin at 405/606-2916 or email her at r.godwin@occf.org.

Investment Terms

Growth Stock - Shares of a company that is growing earnings and/or revenues faster than its industry or the overall market. Typically, these companies pay little or no dividends, preferring to use income to finance further expansion. Growth stocks tend to have higher P/E ratios than the overall stock market because investors expect future earnings growth will be higher than it is currently. P/E ratio is market price per share divided by earnings per share.

Value Stock - A stock that appears undervalued relative to the value of its assets. A stock may be a "buy" as a value stock if its cash per share (or its book value) is high relative to its stock price. P/E ratios tend to be below growth stocks and the market's because investors expect future earnings growth to be less than it is currently. Dividend yields tend to be relatively high.

The Core Equity Style - Designed to produce a market rate return with similar volatility (risk). This makes for a consistent investment strategy that is unaffected by short-term investment style themes such as growth vs. value. These assets

are characterized by low stock turnover and low transactions cost. Core equity investing is a prudent way to preserve assets while at the same time participating in the long-term growth of the economy. Both large cap and small cap core equity investments are utilized.

Definitions of large, mid and small market capitalization vary, but could be reasonably considered as: small cap - less than \$2 billion; mid cap - greater than \$2 billion but less than \$10 billion; large cap - greater than \$10 billion.

Fixed Income - An investment that provides income in the form of fixed periodic payments and the eventual return of principal at maturity. Income is not impacted by the rate of inflation or interest rates. Examples of fixed income investments include government bonds, certificate of deposits, money market and preferred stock.

Benchmark - A standard against which the performance of an individual security or group of securities is measured. The

Oklahoma City Community Foundation uses the Standard & Poor's 500 Stock Index (S&P500) to measure performance of equities investment and Barclays Government/Credit Intermediary (Barclays G/C Int.) bond index to measure fixed income performance.

Developed Market - Investments made in countries considered more developed, less risky than emerging markets.

Emerging Market - Investments made in nations with social or business activity in the process of rapid growth and industrialization.

High Yield Bonds - Bonds that are rated below investment grade at the time of purchase.

Total Return - When measuring performance, the actual rate of return of an investment or pool of investments over a given evaluation period. Total return includes interest, capital gains, dividends and distribution realized over a given time period.

Pooled Investments Performance Summary
